BRITISH WHITE CATTLE SOCIETY - GESTATION SURVEY

In order to determine an average gestation length for the breed, we are asking breeders to provide any calving dates which also had an exact service date recorded. These births may have been from natural service or AI, but we ask that you only provide dates if you are certain that the calf was born as a result of the exact service date.

Historical data will also be accepted. Information given will be used to calculate averages for the breed as well as individual sires.

A 'BIRTH' SHALL BE CONSIDERED ANY CALF BORN EITHER ALIVE OR DEAD AT FULL TERM (OR LATER), OR PREMATURE IF THE CALF SURVIVED – CALVES BORN DEAD AS A RESULT OF BEING BORN PREMATURE ARE TO BE CONSIDERED ABORTIONS AND SHOULD NOT BE RECORDED FOR THE PURPOSES OF THIS SURVEY

DATES ONLY NEED BE PROVIDED FOR CALVES BORN TO A PEDIGREE BRITISH WHITE SIRE AND DAM (NOT NECESSARILY SOCIETY REGISTERED)

PLEASE PROVIDE DEFINITE SERVICE DATES ONLY – NO ESTIMATED DATES OR 'RAN FROM X TO Y'

Dam name	**Dam ear no.**	**Service date**	**Calving date**	**Sire of calf**
